

# Abhishek Nagaraja

Dallas, Texas, USA • [work.abhishekn@gmail.com](mailto:work.abhishekn@gmail.com) • [linkedin.com/in/abhisheknagaraja](https://www.linkedin.com/in/abhisheknagaraja) • [www.abhishekn.in](http://www.abhishekn.in)

Product & Growth Professional specializing in GTM Strategy, Community Building, and Technical Product Marketing. Expert in orchestrating two-sided marketplace launches and bridging the gap between engineering innovation and commercial adoption. Proven ability to drive user acquisition and optimize revenue operations.

## Education

|                                                            |                         |
|------------------------------------------------------------|-------------------------|
| University of Texas at Dallas                              | Dallas, Texas, USA      |
| Master of Science in Computer Science                      | August 2023 - May 2024  |
| Master of Science in Engineering Management                | May 2024 - Current      |
| Jawaharlal Nehru Technological University                  | Hyderabad, India        |
| Bachelor of Technology in Computer Science and Engineering | August 2019 - July 2023 |

## Work Experience

Program Manager Intern, University of Texas at Dallas - Texas, USA October 2023 - October 2025

- Orchestrated the end-to-end product lifecycle for 'MavMarket', scaling the event to 200+ vendors and 5,000+ attendees while generating \$120,000 in revenue, by executing a comprehensive and highly optimized vendor acquisition strategy.
- Improved stakeholder Net Promoter Score (NPS) by 35% and engagement by 25% by executing a high-fidelity feedback system for 100+ vendors and 200+ attendees, utilizing user research to identify and resolve key friction points.
- Reduced event planning time by 40% by architecting a 50+ page, AI-powered Standard Operating Procedure (SOP) in Gemini that improved organizational efficiency and delivered a consistent and professional user experience for all MavMarket users.
- Grew the university's Entrepreneurship Club to 100+ active members by founding the organization, leading a 10-member executive board, and facilitating over 20 workshops by utilizing a peer-to-peer mentorship pipeline to drive community growth.
- Enhanced community engagement for the local '1 Million Cups' chapter by successfully onboarding 24 local founders, utilizing targeted go-to-market strategies and high-value networking events to foster a thriving student builder brand.
- Demonstrated domain expertise as measured by zero launch delays, by utilizing complex physical infrastructure coordination and strictly executing on-site vendor pipelines to consistently align all business and strict operational requirements.

Founder and Community Lead, e-DAM Community - Hyderabad, India March 2021 - July 2023

- Spearheaded community growth to 5,000+ members by performing Market Analysis and building a strategic network of industry partners, by utilizing 200+ technical workshops to foster a thriving, scalable, and inclusive developer ecosystem.
- Iterated on technical curriculum content based on high-value attendee satisfaction metrics, by utilizing narrative data and feedback loops to continuously improve learning outcomes and drive professional builder engagement for community members.

Business Analyst Intern, NFC Solutions Private Limited - Hyderabad, India April 2022 - January 2023

- Drafted Product Requirement Documents (PRDs) and coordinated task delegation for 4 key projects, serving as the bridge between stakeholders and technical teams by utilizing Jira to ensure consistent and on-time delivery cycles.
- Improved development efficiency by 20% by serving as Scrum Master, applying Lean-Agile principles to streamline workflows and ceremonies by utilizing bi-weekly retrospectives to identify, document, and remove complex process blockers.
- Optimized the end-to-end order lifecycle for an e-commerce platform to improve customer satisfaction, by leveraging automated inventory triggers and pricing logic to reduce data processing errors and improve reliability by 15%.
- Demonstrated execution excellence as measured by zero-defect deployments, by proactively mitigating critical project risks and utilizing Gantt charts in Jira to manage 100% on-time delivery across 4 complex enterprise projects.
- Served as the primary liaison for stakeholder translation, by bridging technical complexity for non-technical executive leadership to strictly align product roadmaps, requirements, and business goals across global teams.

## Strategic Projects & Analysis

### Google Maps: Product Strategy

- Translated qualitative data from 42 user interviews into two core problem statements, revealing a critical user need for guaranteed menu accuracy by utilizing UX journey mapping to identify high-friction drop-off points.
- Architected a product strategy to directly address validated user needs, by utilizing a roadmap for a centralized menu system with granular filtering to capture the high-value market segment with critical dietary requirements.

### Clash of Clans: Growth Strategy

- Proposed a viral growth strategy driving 5-10% new organic user acquisition by creating a native social sharing feature for key in-game content, by utilizing referral loop optimization and player behavioral data patterns.
- Projected a 15-20% increase in join rates and 20-30% increase in feature adoption by designing a revamped Clan Discovery engine and transforming the feed by utilizing data-driven insights, metrics, and predictive UX patterns.

## Technical Projects

---

### Thara: Multi-Agent AI Ecosystem

- Architected a scalable Multi-Agent AI infrastructure enabling 11 specialized autonomous agents to orchestrate complex workflows by engineering a LangGraph-based state machine synchronized with a FastAPI backend and PostgreSQL.
- Revolutionized the productivity experience by automating tasks, habits, and 'Ikigai' alignment via the 'Thara' ecosystem that combine proactive AI coaching with real-time behavioral recognition to ensure goal attainment.
- Demonstrated domain expertise as measured by zero critical system failures, by utilizing complex system resilience architectures, proactive API security, and automated error handling workflows to heavily strengthen the entire product ecosystem.
- Optimized feature adoption rates by 20 percent by executing a robust user research methodology and rapidly iterating on core UI/UX designs based on iterative A/B testing results and high-fidelity predictive user heatmap analytics.

### Resume Agent - AI Resume Engineering System

February 2026 - Present

- Orchestrated a 'Single Source of Truth' architecture using YAML and Jinja2, reducing resume tailoring time by 95% for multiple job families (TPM, Product) by decoupling content from layout and utilizing modular data inheritance.
- Engineered an automated Quality Assurance protocol that enforces the Google 'XYZ' formula, by leveraging Python-based validation logic to identify, audit, and reject localized experience content lacking measurable impact, metrics, or depth.
- Achieved consistent >90% parsing scores across standard ATS checkers by decoupling data from design using a custom LaTeX class structure that prioritizes machine readability, accessibility, and semantic document structure.

### Split-Wiser: AI Expense Tool

- Reduced splitting time by 76% and validated app stability by monitoring the platform in a secure pre-production environment, isolating and troubleshooting all reported issues using strict QA protocols to guarantee zero critical defects.
- Enabled fair and precise expense splitting by applying complex context engineering to design a conversational AI agent, building a custom OpenAI GPT that parses unstructured data to guide users through a strict and robust verification workflow.
- Demonstrated domain expertise as measured by zero security breaches, by seamlessly leveraging financial reconciliation, user verification workflows, and strict KYC/AML compliance and ACH/SWIFT rules to securely align all business requirements.

### Product-Pal: AI Product Teardown Specialist

- Reduced product analysis time by 70% and successfully increased strategic throughput by 3x by designing an AI agent utilizing n8n workflows to fully automate the end-to-end teardown process from discovery research to final GTM strategy.
- Applied context engineering to design a complex multi-step analytical workflow, by utilizing structured prompts that accurately guide the LLM to highly specific, actionable results while mitigating technical hallucination risks.

## Skills and Tools

---

- GTM & Growth Strategy: Go-to-Market (GTM) Strategy, Product Positioning, User Acquisition, Market Adoption, Revenue Operations, Competitive Analysis, Brand Strategy, Event Monetization, TAM/SAM/SOM modeling, SaaS Revenue Forecasting, Pricing Realization Analysis, Churn Rate optimization, Market Entry Barriers, M&A Due Diligence, Competitive Counter-strategies, P&L Management.
- AI-Powered Marketing & Sales: AI-Powered Revenue Ops, Automated Lead Scoring, GTM Bot Development, Generative AI (Gemini/GPT-4o), Prompt Engineering, n8n Automation, Context Engineering.
- Technical Growth Tools: Python (Scripting), SQL, Zapier, API Integration, Google Analytics, Amplitude, Power BI, Excel (Advanced), GitHub, Antigravity, Cursor, Windsurf, v0, Salesforce (SFDC), CPQ platforms, Power Automate, Smartsheet, Monday.com.
- Soft Skills & Messaging: Product Storytelling, Market Messaging, Cross-functional Leadership, Stakeholder Management, Narrative Data, Strategic Communication.
- Methodologies: Agile, Scrum (CSPO), Lean-Agile, SDLC, SEO/SEM, Customer Retention (LTV/CAC), SOP Architecture.

## Certifications

---

- Certified Scrum Product Owner (CSPO)
- AWS Certified Cloud Practitioner (In Progress)

- Google: Data Analytics Specialization
