Hello Hiring Manager,

As a Strategic Program and Operations Manager, I am driven by the impact of creating order from ambiguity and aligning diverse teams around a unified goal. My philosophy as a builder centers on operational excellence—I believe that the best programs are those where strong culture and rigorous execution intersect to drive measurable business value. I am eager to bring this execution-first mindset to scale your operations.

Beyond my technical foundation in Computer Science and Engineering Management, my core value lies in how I operate under pressure. I thrive in complex environments, acting as the bridge between highly technical engineers and business stakeholders. By prioritizing process standardization, lean-agile methodologies, and transparent communication, I establish a culture where cross-functional teams feel empowered and aligned.

This approach defined my leadership of the 'MavMarket' initiative at the University of Texas at Dallas. By leaning into my technical empathy to architect an AI-powered SOP in Gemini, I didn't just scale the event to 200+ vendors and 5,000+ attendees; I built a resilient community framework. Resolving critical friction points through targeted user research reduced planning overhead by 40% and cemented a high-trust environment across all stakeholders.

I am looking for an organization that values deep ownership, operational rigor, and a culture of continuous improvement. I am eager to apply my management expertise to your strategic initiatives and look forward to the possibility of contributing to your team's success.

Sincerely,

Abhishek Nagaraja
