Yuvraj K

Entrepreneur | Product Manager | Strategy and Operations |
Mechanical Engineer | Tech for Impact | Business
Greater Hyderabad Area

Summary

I'm a mechanical engineer, entrepreneur with hands-on experience building sustainable hardware products from the ground up. Over the past 3 years, I've led product development at Padverse, a startup focused on menstrual hygiene and recycling technology—taking MVPs from concept to prototyping, managing cross-functional teams, and securing strategic grants.

With deep experience in product design (Fusion 360, SolidWorks, Ansys) and business operations, I specialize in translating real-world problems into scalable product solutions. As Vice President of E-Cell IARE, I have guided teams to national success, mentored early-stage founders, and conducted workshops on innovation and startup strategy.

I'm now actively seeking Product Management or Strategy Consulting roles, where I can bring my unique blend of engineering, leadership, and entrepreneurial execution to drive meaningful impact.

Let's connect if you're building in product, strategy, or sustainability.

Experience

Padverse
Co-Founder
August 2022 - January 2026 (3 years 6 months)
Telangana, India

Padverse is an effective menstrual hygiene management ecosystem aiming to create period friendly workplaces. Our innovative technology cleans and disinfect used sanitary napkins and recover material for up-cycling and recycling opportunities.

As head of product development built various machines to accommodate the recycling capacity adjusting to technology requirements. Raised multiple grants including SISF from T-Hub to develop MVP.

Oversaw daily operations, strategic planning, and team coordination to drive business growth.

e-DAM

Human Resources Officer

October 2022 - January 2023 (4 months)

Hyderabad, Telangana, India

HR's primary activities include recruitment, administration, compensation and benefits, training and development, and employee relations and performance management. However, they often do much more.

Srikrishnaa Processs Technologies Pvt Ltd

Engineering Trainee

July 2022 - July 2022 (1 month)

Hyderabad, Telangana, India

- Acquired in-depth knowledge of Chemical Reactors and its operations, including its various components and machining processes involved.
- Used Auto CAD and Fusion 360 predominantly for designing and synthesis of the chemical reactors.

National Small Industries Corp (Nsic)

Computer Numerical Control Programmer

April 2020 - December 2020 (9 months)

Hyderabad, Telangana, India

- Acquired in-depth knowledge of CNC (Computer Numerical Control) and NC (Numerical Control) operations, including programming, setup, and execution of machining processes.
- Developed proficiency in CAD/CAM software, learning how to create precise 2D and 3D models for CNC machining applications.
- Gained hands-on experience in toolpath generation, material selection, and optimization of machining parameters to improve manufacturing efficiency.
- Learned industry-standard manufacturing processes, quality control techniques, and safety protocols to ensure precision and compliance in machining operations

Education

Institute of aeronautical engineering

Btech, Mechanical Engineering · (September 2021 - September 2024)

TKR College of Engineering and Technology

Diploma , Mechanical Engineering · (June 2018 - May 2021)

The Secunderabad Public School

High School Diploma, Senior Secondary · (March 2017 - May 2018)
